- **English Track 5.002 (here), German Track 5.001**
- **Twitter Hashtag #SwissPGDay (sfkeller@hsr.ch)**

Swiss PGDay 2019

The Swiss conference on PostgreSQL

Closing Session

1. Better performance for B-Tree indexes and partitioned tables
2. CTE “WITH” queries now inlined, enforced: WITH foo AS MATERIALIZED...
3. JIT enabled by default - Useful for data warehouse queries)
4. JSON path “queries” as per SQL/JSON spec., incl. some index support
5. “Generated Columns” = cols. which are always computed from other cols.
6. Pluggable table storage - CREATE TABLE foo(...) USING magic_storage;
7. PostGIS extension v3: Better performance thanks to parallelization

Notes:

- Standard SQL:2020 (or later?) will have Graph database functionality
- Have to rebuild indexes (at least on Linux) glibc 2.28, 1 August 2018

Closing Session (2 of 3)

Speakers

- Send presentations to info@pgday.ch, to be published at pgday.ch/2019
- Come to the front for a final group photo!

Feedback - Participants

- Navigate to www.pgday.ch ; Click on "Feedback" ; Enter your token (or contact info@pgday.ch)

Closing (3 of 3)

■ Forthcoming Events

- **Swiss PGDay 2020**: same time, same place !?
- **Swiss PostgreSQL Users Group Talks**: See www.swisspug.org
- See also **PostgreSQL Events**: <https://www.postgresql.org/about/events/>

■ Spread the word: On Twitter #SwissPGDay or LinkedIn

■ «Apéro» (aperitif, reception) at Cafeteria Building 1!

Hashtag #SwissPGDay
